MAY 22 2001

To Whom it May Concern:

1 I have perused the Supplement sent to me regarding the Disposal of Radio active Materials at Yucca Mtn. and I find the entire project detrimental to the environs and population of Southern Nevada... specifically Las Vegas.]

2 [Since we do not create or generate spent nuclear fuels in our County, City and State, why dump it in our back yard?

The States that are now generating these horrific products should keep them in their own areas. Obviously, they are storing these radioactive wastes on or near their premises at present so why not continue to do so?]

3 [Anyway, there's all kinds of Big Sky Country north of us (Wyo., Mont., the Dakotas) with less dense population. Why not dump it there? Why single out our State? We didn't create it and we don't want it.]

For that matter, we have not yet begun to fight. If you think it's so safe, YOU bury it in your back yard!

Very truly yours,

Dorothy B. Bolognini
